“Sustainability is a concept more than a strict code. It refers to responsible and ethical methods of practice in economic, social and environmental management. In many ways sustainability refers to new methods of old practices. It is often misinterpreted as relating solely to the environment, but in practice, it is an integrated approach to all aspects of life - economic, social, environmental and cultural.”

– Dr. Ann Behan, November 2002

CONTENTS:

1. Introduction	1
2. History of Forestry in Ireland	2
2.1 References	3
3. Forestry Acts and the formation of Coillte Teoranta	4
