The Woodland League

Save Ireland's Forests - Petition

www.woodlandleague.org

Dedicated To Restoring The Relationship Between People And Their Native Woodlands

The Irish Government is moving closer to a **huge sell-off of the public forests**, currently managed by Coillte (The Irish Forestry Board), to private investors. An area greater than 1 million acres, equivalent to two medium sized counties, will be lost forever. This will include some of our most **valuable native woodlands**, wild places and some of the last refuges of our native flora and fauna.

Target: Mary McAleese, The President of Ireland, and the Irish Government.

We the undersigned,

- wish it be known that the **Public Forests** belong to the people of Ireland and are **not for sale**.
- want to see complete root and branch reform of Irish forestry policy.

Sincerely,

The undersigned.
